Mr. Raul Siso
Manager Sales Export

Mr. Jorge Siso
Manager Production

The company Hnos. Sisó S. C. was founded in 1992, has been in business for more than 30 years, has a business structure of family origin, and is located in the town of Fraga in the province of Huesca in the Northwest of Spain. In 2012, a new section Sisó Export S.L. was created, which for business reasons is exclusively for the marketing and export of fruit.

The main activity is the production and export of peaches, nectarines, paraguayos, platerinas and kakis. It has its own fields for production, and a Central to make and distribute its products. The company sells the fruit that its own fields produce, although it also takes care of the fruit of other farmers in the area, a job that it does with all seriousness and responsibility, since it is aware of the personal and economic effort that the farmer makes so that his exploitation be profitable.

The Central, with the technology available, has the ability to make its products according to the preferences of each client, from unified 1kg baskets, 500 gms baskets, 10x1 formats with 10kg boxes, 4kg boxes in alveolo, donuts 10x500 gms, etc... Product is available from May to October, and the campaign ends in December with Kaki. In addition, it can serve orders from one pallet to 26 pallets (full truck), as well as maritime containers without affecting the cold chain thanks to the arrangement of the refrigerated loading dock that it has in the facilities.

SISO is a brand that has carved a niche for itself in the market, and sells in all sales channels: markets, distributors, wholesalers and supermarkets. SISO products are sold to customers who are very demanding with quality throughout Europe, and it has been thanks to these demands that it has been able to sell to markets as far away and demanding as the Scandinavian Countries or Russia, and on other continents with transatlantic shipments to Brazil with long sea voyages.

In recent years given the recent world events, very strict conditions are being imposed on fruit and vegetable companies, related to food safety and hygiene. Quality and food safety have always been the foundation of the company since its foundation, to the point that in 2004 Hnos. Sisó S.C. was one of the first companies in the area to obtain the EurepGAP quality certificate. Currently, in addition to others, it has the Global Gap and Grassp certificates to guarantee all the quality of its products.

The team of professionals that make up the company carefully checks all the phases of product development, since only by controlling all the processes from production on the tree, selection, packaging, labeling, cooling, loading and, finally, transport, you can be sure to offer customers a high quality product and with all the Food Safety.
